

A background consisting of vertical stripes of various colors, transitioning from green on the left to purple on the right, with yellow, orange, and red in between. The stripes are slightly blurred and have a gradient effect.

PROJECT COLOR

Computers Learning foR all
CoLoR their lives; CoLoR yours

About CoLoR

- Computers have affected every aspect of our day-to-day life. Nowadays, computers are widely used for education and training purposes; many schools are equipped with computers for educating their students. A lot of educational material that can be used to supplement curriculum material is available via computers program. Thereby making computers an integral part of education system. As a matter of fact, computers have become a learning tool for children and have revolutionized the learning for students in a big way.
- Unfortunately, due to the funding and budget consideration, many schools in Indonesia still can't afford to procure computers facility for their students.
- Given this concern, the **CoLoR** program was initiated; aiming to donate computers to schools with lack of or no computers facility.
- All of our children should be able to learn better. Computers learning should be able to be enjoyed by all. School's budget limitation should not limit the opportunity of our children to keep-up with this computer age. Computers Learning is foR all of our children.

CoLoR program target

- As the initial program, we plan to distribute set of computers (PC, flat monitor, keyboard and mouse) to schools with no computer facilities in the areas of Jakarta, Bogor, Tangerang, Bekasi and Serang.
- We hope **CoLoR can** be a continuous program so there will be more and more children can enjoy computers learning.
- As a launching program, we plan to distribute 10 set of computers.
- Join us in **CoLoR! CoLoR** their lives; **CoLoR** yours.

CoLoR Team

- We are a group of people who enjoy spending our leisure by travelling. Our team members consist of different types of people; we meet and gather due to a common interest of the beauty of Indonesia.
- In this **CoLoR** program, we gather and cooperate with an aim of **CoLoRing** children lives.
- Join us in **CoLoR! CoLoR** their lives; **CoLoR** yours.
- **CoLoR** team members are attached in this proposal.

How to Join CoLoR?

- We welcome any kind of participation and contribution (e.g. laptop, PC, monitors, keyboard, etc). Any money donation channeled through **CoLoR** team will be used to purchase computers and its related equipments.
- Please contact Ahmad Zakaria (**Zaka**) – our Project Manager (email: zka@ahmadzakaria.net or phone +62-818-08675834) for further information.

Thank you from CoLoR...

Your support and participation will play the greatest role on
the success of **CoLoR program**.

We thank you for your contribution and participation
